The new program can turn a page in any PDF document. The program includes a PDF editor, which allows you to make changes, and a PDF viewer. Features of the program include: * A panel for opening/saving, * Reading text * Reading a form * Saving a form * Password protection * Search functions, * Drag and drop * An external PDF document viewer. All of these features are very useful to work on the PDF files in a modern digital way. Moreover, you can work with multiple PDF documents at the same time. This software is really useful for the "makers" who can create, modify, edit and save the PDF files. 9. Dentist on-line. Dentist on-line is an internet dental software package for dentists and dental assistants. It is a web-based platform that allows dentists to remotely handle multiple patients at once. The program contains: * Registration * Online scheduling and scheduling tracking * Online payment * Online account management * Online appointment tracking * Communication between dentists and patients * Online patient history * Online appointment recording * Online patient treatment plans * Online patient communication * Online billing and accounts * All dental practices can update the program on the web. The Dentist On-line software is a great benefit for both the dentist and dental assistant. With the Dentist On-line, it is easy to manage a dentist's practice from any computer. The dental assistant can use the dental software to help the dentist record

more dental procedures. The application also allows patients to store all their personal information online. With Dentist On-line, it is easier than ever for patients to use the internet to pay for their dental treatments. 10. Chromium. Chromium is a free video recording application for Mac OS X, created by NCH Software. The software records any desktop video clip, and makes it easy to capture desktop video in many different formats. Features of the software include: * Audio and video recording * Automatic video recording * Video recording * Picture in picture recording * Slow motion recording * Slideshow recording * Simple annotation * Playback * File export * Export to AVI and MKV * Email capture * Send link by email * Set a time limit for recording * Audio feedback * Insert transition/delay time in recording * Time zone support * Start recording * Stop recording * Sleep recording * Zoom in/out * Share to other apps, services, social networking * Save to cloud * Share to Twitter and Facebook * Markup: Tag, text, and links * 82157476af
